COMPREHENSIVE LIPID PANEL & 12-LEAD CARDIAC ECG REPORT

NABL ACCREDITED LAB • ABDM HEALTH LOCKER INTEGRATED • ISO 15189:2022 CERTIFIED

Patient Name:	chandra	Collection Date:	28-Aug-2026 07:45 AM
UHID / ID:	P7923	Reported Date:	28-Aug-2026 10:30 AM
Age / Gender:	42 Y / Male	Ref. Doctor:	Dr. A. Sharma (MD, General Medicine)
ABHA Address:	14-8921-3310-7762	Sample Type:	Fasting Serum & 12-Lead Resting ECG

INVESTIGATION REPORT & CLINICAL FINDINGS

TEST / INVESTIGATION	OBSERVED VALUE	REFERENCE RANGE	UNITS	STATUS
Total Cholesterol	224	< 200	mg/dL	HIGH
Triglycerides	182	< 150	mg/dL	ELEVATED
HDL Cholesterol (Good)	42	> 40	mg/dL	NORMAL
LDL Cholesterol (Calculated)	148	< 100	mg/dL	HIGH
VLDL Cholesterol	36.4	5 - 40	mg/dL	NORMAL
Total / HDL Ratio	5.33	< 4.5	Ratio	HIGH
Resting 12-Lead ECG Rate	76	60 - 100	bpm	NORMAL
Resting 12-Lead ECG Rhythm	Normal Sinus	Normal Sinus	Electrical	NORMAL

CLINICAL IMPRESSION & REMARKS:
1. Lipid panel reveals moderate mixed Dyslipidemia with elevated Total Cholesterol and LDL-C.
2. Elevated Atherogenic Index (Chol/HDL ratio: 5.33). Consistent with Stage 1 Hypertension.
3. Resting 12-lead ECG demonstrates normal sinus rhythm with no ST-T segment ischemic shifts.
4. Recommendation: Continue antihypertensive therapy (Telmisartan) and initiate statin (Atorvastatin).
