

AIIMS / ABDM PARTNER CLINICAL LABORATORY

HEMATOLOGY & RESPIRATORY MICROBIOLOGY INVESTIGATION REPORT

NABL ACCREDITED LAB • ABDM HEALTH LOCKER INTEGRATED • ISO 15189:2022 CERTIFIED

Patient Name: **chandra**
UHID / ID: **P7923**
Age / Gender: 42 Y / Male
ABHA Address: **14-8921-3310-7762**

Collection Date: 04-Sep-2026 08:30 AM
Reported Date: 04-Sep-2026 11:45 AM
Ref. Doctor: **Dr. A. Sharma (MD, General Medicine)**
Sample Type: EDTA Whole Blood & Throat Swab

INVESTIGATION REPORT & CLINICAL FINDINGS

TEST / INVESTIGATION	OBSERVED VALUE	REFERENCE RANGE	UNITS	STATUS
Total Leukocyte Count (WBC)	7,800	4,000 - 11,000	/uL	NORMAL
Absolute Neutrophil Count	4,500	2,000 - 7,000	/uL	NORMAL
Absolute Lymphocyte Count	2,400	1,000 - 3,000	/uL	NORMAL
Platelet Count	235,000	150,000 - 450,000	/uL	NORMAL
Hemoglobin (Hb)	14.2	13.0 - 17.0	g/dL	NORMAL
C-Reactive Protein (Quantitative CRP)	4.2	< 6.0	mg/L	NORMAL
Rapid Throat Swab Culture	Negative	Negative	Qualitative	NORMAL
Beta-Hemolytic Streptococci	Not Isolated	Not Isolated	Culture	NORMAL

CLINICAL IMPRESSION & REMARKS:

- Complete blood count shows normal total leukocyte count and leukocyte differentials.
- Rapid throat swab culture is negative for Group A Beta-Hemolytic Streptococcus.
- Findings are consistent with Acute Viral Upper Respiratory Tract Infection (Viral Pharyngitis).
- Correlate clinically with symptomatic therapy (antihistamines, antitussive hydration).
